

Heating System Standard Protection Plan?

What services are covered under the

Under the plan	Not include in the plan
<p>21 point inspection includes Visually inspect</p> <ul style="list-style-type: none"> ● Vent pipings ● Test Combustion air openings ● Check Air Filters ● Combustion chamber ● Examining the burners ● Check Blower ● Inspect vent motor ● Heat exchangers ● Greasing MovingParts ● Belt Drive ● Thermocouple ● Adjusting the pilot light ● Electrical Connections ● Manifold Gas presuures ● Gas line for Leaks ● Vestibule interior ● Safety controls ● Supply and return air temperatures ● Carbon monoxide testing ● Make final operational Check ● Advise customer of Results of check 	<p>Replacement and repair Of the Following</p> <ul style="list-style-type: none"> ● Gas valves ● Automatic vent damper/motor ● Blower housing ● Condensate pump ● Door switch, Summer/winter switch ● ignition system, Pilot burner ● Safety chain limit controls, transformer ● Blower motor, Inducer motor assembly ● Boiler Flow sensor, Aquastat controls ● Furnace low voltage circuit fuse ● Gas burner, Gas control and orifices ● Power burner motor ● Pulley and belt ● Relay, Roll out switch,Vent system pressure switch ● Zone valves, Pumps of any kind ● Thermocouple/generator ● Thermostat of any kind (Wi-Fi enabled) ● Heat exchanger, Heating coil (air handler) <p>Heating sections (boiler)</p> <ul style="list-style-type: none"> ● Firebox/combustion chamber ● Low and high water cut-off valves ● Ancillary Parts ● Furnace filters ● Replacement of complete heating unit
